Targeting and Tools

TARGETING AND TOOLS	DEFINITION	ADD TO CPM
Shake Me	ShakeMe™ is a motion-activated and interactive audio ad format that invites listeners to shake their phones or smartwatches to complete a desired action, such as downloading a coupon, placing a call, or opening a web link. Because we so often listen to audio while exercising, working, commuting, or cooking, we can't always stop and pick up our phones to visit a brand's website. With ShakeMe™, listeners can interact directly with the ad without unlocking their phone or even looking at their screens – providing immediate measurement of a conversion.	15%
Digital Attribution Tracking	AudioPixel is a digital tracking pixel that enables advertisers to measure the success of their ad campaigns by matching the users who heard the ads to the users who subsequently performed a certain action – like visiting a website, making a purchase, or downloading an app. AudioPixel was designed specifically for “audio first” campaigns and can help advertisers make data-driven decisions on audience targeting, delivery frequency, creatives, and more. Optimize on the fly	R40 CPM
